* *Bottler Barley is now being commercialised & EPR collected by Seednet. For information, please contact Seednet 1300 799 246 or admin@seednet.com.au*

Comments

Name

Signature

Date

Please note, by signing this form you agree that you are supplying PGG Wrightson Seeds Australia Pty Limited (ABN 83004227927), trading as GrainSearch® with accurate figures for production and seed retained in the 2022/2023 harvest season.

GrainSearch® varieties are protected by either the Plant Breeders Rights Act (1994) (and are grown under the Terms & Conditions of the GrainSearch Industry Standard Variety License Agreement) or are protected by a specific Non PBR Variety License (Nitro). Copies of the relevant GrainSearch® Variety Licenses are available on the Variety Central website (www.varietycentral.com.au)

Through either growing a GrainSearch® variety and/or purchasing seed of a GrainSearch® variety, it is a legal requirement to accurately complete this GrainSearch® Harvest Declaration and return it to us by the due date.

End Point Royalty (EPR) is payable per variety (\$/t) on the **BALANCE** between your entity's Total Grain Production and the amount of Seed Retained. **If** GrainSearch® receives auto-deduction payments from participating grain trading companies on behalf of your entity, we will reduce the total EPR owing by any auto-deduction payments received relating to your entity. Please note that not all grain buyers auto-deduct EPR payments. EPR's are separate to the compulsory DAFF levy, which is shown as a % deduction off your total \$ payment amount.

INSTRUCTIONS

In the table on Page 1 of this form, please complete the boxes with the following figures:

TOTAL GRAIN HARVESTED (t) – this is the **total amount of grain (tonnes)** you have harvested of the listed variety.

This amount must include:

- all grain you are still storing on farm, in warehouse, or have fed to livestock
- all grain you have sold since harvest, even when auto-deductions have been recorded on the sales.
A sale also includes your use of this grain as livestock feed
- all grain you intend to use as seed to sow in the following season(s)

RETAINED AS SEED (t) is the amount of seed you have retained of the variety, to **sow in the coming season(s)**. This figure **DOES NOT** include amounts that you are retaining on farm for feed.

If a variety is not relevant to your farm, please enter Zero (0) for the total grain harvested figure.

If you have retained seed from a previous season, or purchased new seed for the season and did not harvest the variety for any reason, please place a zero (0) in the box for the applicable variety and indicate this in the comments box (e.g. – Revenue – cut for hay due to severe frost damage)

If you have sown a variety for fodder production only, please place a zero (0) in the box for the applicable variety and indicate this in the comments box (e.g. – Manning: sown for fodder production only)

Please complete, sign and return this form to GrainSearch® by the 30th April 2023

Post: GrainSearch 5 Endeavour Way Alfredton Vic 3350

Remit online: www.grainsearch.net.au

Enclosed is the 2022-23 GrainSearch® Harvest Declaration Form.

For your convenience we also make it possible to submit an online harvest declaration form through our website www.grainsearch.net.au using your Online Harvest Declaration key, located in the top right corner of this Harvest Declaration Form.

Please provide any corrections/changes to your contact details and company/trading name(s), so that we can correctly match data to incoming grain sales data and/or auto-deduction payments. This avoids the possibility of double invoicing End Point Royalties (EPRs).

We ask you to complete and return the Harvest Declaration Form by the **30th of April 2023**

Please do not wait until you sell grain before completing this form, as we will track any applicable auto-deductions throughout the season.

Please note that it is a legal requirement under the Plant Breeders Rights Act (1994), to complete the Harvest Declaration Form and return it to us, noting the production of any of the GrainSearch® varieties listed. You can only grow Nitro barley by first signing the Variety License Agreement at the time of purchasing seed (or sowing retained seed in subsequent seasons). It is ESPECIALLY IMPORTANT for growers who have only produced fodder (or cut for hay) to provide details to us by the due date – as it avoids us continually sending you follow up messages throughout the year requesting your harvest declaration details.

GrainSearch® relies on the information provided by growers and their End Point Royalty (EPR) payments.

If you would like information about any of the GrainSearch Varieties and the availability of seed, please contact either myself or Blair McCormick at bmccormick@dlfseeds.com.au

If you require more information about the GrainSearch® Harvest Declaration Form and how to complete it, please contact me as below.
